SEO / GEO / AEO Audit Report

FULL AUDIT

SEO	GEO	AEO
6	4	3
On Track	Needs Work	Needs Work

Audit date: July 12, 2026

Claude Skill and Plugin by Alex Labat

Executive Summary

KD's Exotics has a credible technical SEO foundation: HTTPS, canonical URLs, a working sitemap and robots file, descriptive titles, social metadata, and valid organization/service schema. The urgent weakness is not crawlability but authority and content depth. Search results reviewed during the audit did not surface the brand for branded or priority local queries, while competitors show richer proof, longer service content, reviews, business history, and more indexable inventory detail. The fastest path forward is to establish the Google Business Profile, publish verifiable trust signals, make active fleet content server-readable, and expand location pages into genuinely useful local resources.

Dimension	Score	Status	Key Takeaway
SEO	6/10	On Track	Strong fundamentals; thin pages, dynamic fleet rendering, and weak search visibility limit performance.
GEO	4/10	Needs Work	Clear entity basics, but little experience proof, original evidence, or externally corroborated authority.
AEO	3/10	Needs Work	FAQ content exists, but answers are not marked up and most pages lack question-led, extractable responses.
Combined	13/30		Technical readiness exceeds the site's current authority and answer usefulness.

Pages Audited

The crawl covered every meaningful indexable page in the live sitemap. Privacy and terms pages were confirmed in the sitemap but excluded from content-quality scoring under the full-audit rules.

URL	Page Type	Observed signals
/	Homepage	45c title; 168c description; 492 words; 1 H1; AutoRental, Organization schema.
/fleet	Fleet	58c title; 110c description; 109 words; 1 H1; no schema.
/partner	Partner	31c title; 95c description; 227 words; 1 H1; no schema.
/about	About	47c title; 134c description; 218 words; 1 H1; WebPage schema.
/rental-policies	Policy	30c title; 130c description; 259 words; 1 H1; WebPage schema.
/locations/los-angeles-exotic-car-rental	Location service	44c title; 125c description; 219 words; 1 H1; Service schema.
/locations/orange-county-exotic-car-rental	Location service	46c title; 141c description; 225 words; 1 H1; Service schema.
/locations/beverly-hills-luxury-car-rental	Location service	46c title; 116c description; 210 words; 1 H1; Service schema.
/locations/newport-beach-exotic-car-rental	Location service	46c title; 122c description; 216 words; 1 H1; Service schema.
/locations/lax-exotic-car-delivery	Location service	38c title; 101c description; 229 words; 1 H1; Service schema.
/locations/sna-exotic-car-delivery	Location service	38c title; 114c description; 220 words; 1 H1; Service schema.

SEO Analysis

Score: 6/10 - On Track

Technical On-Page

Signal	Finding	Status
HTTPS and status	All 11 audited pages returned HTTP 200 over HTTPS.	Good
Canonical URLs	All audited pages contained self-referencing canonical tags on the preferred www domain.	Good
Robots and sitemap	robots.txt allows crawling and points to a valid 13-URL XML sitemap.	Good
Titles	Titles are unique and mostly concise. Fleet is 58 characters; several inner-page titles are short but descriptive.	Good
Meta descriptions	All pages have unique descriptions, but the homepage is 168 characters and several others are only 95-125 characters with weak calls to action.	Needs Attention
Heading structure	Each page has one H1. The homepage includes empty H2 elements and the partner H1 text is image/JS dependent in the raw parse.	Needs Attention
Fleet rendering	The fleet page raw HTML contains only about 109 words and no car inventory; core listings depend on JavaScript and Supabase.	Needs Attention
Images	All HTML images audited had alt attributes, though decorative empty-alt images and dynamically injected vehicle images require ongoing checks.	Good
Redirect consistency	The non-www domain redirects to www, matching canonical URLs.	Good

Content Quality

Signal	Finding	Status
Page depth	Homepage is about 492 words; all inner service pages are about 210-259 words, below the depth expected in a competitive local rental market.	Needs Attention

Signal	Finding	Status
Local relevance	Six distinct pages target LA, Orange County, Beverly Hills, Newport Beach, LAX, and SNA with practical delivery context.	Good
Inventory content	Active cars are useful commercial landing pages, but sitemap discovery and server-rendered links are limited by the dynamic inventory architecture.	Needs Attention
Freshness	No visible updated dates, editorial cadence, news, guides, or local resources establish freshness.	Missing
Internal linking	Homepage and generated pages provide 10-16 internal links, but contextual cross-links between locations, policies, and relevant vehicles are limited.	Needs Attention
Search visibility	Audit searches did not surface KD's Exotics for site:, branded, or priority local queries; established competitors dominated results.	Missing

Structured Data

Signal	Finding	Status
Business entity	Homepage has valid JSON-LD declaring AutoRental and Organization, phone, logo, URL, service areas, and Instagram.	Good
Service schema	Each location page has valid Service schema tied to the business entity.	Good
Fleet schema	Fleet has no ItemList or OfferCatalog schema in raw HTML. Active vehicle pages do not expose Product/Vehicle/Offer schema.	Missing
FAQ schema	Homepage FAQs are not represented with FAQPage schema.	Missing
Breadcrumb schema	Location and vehicle hierarchies do not expose BreadcrumbList schema.	Missing

GEO Analysis

Score: 4/10 - Needs Work

E-E-A-T Assessment

Signal	Finding	Status
Entity clarity	Business name, domain, phone, email, delivery-only model, service areas, and Instagram are stated consistently.	Good
About information	The About page explains the service model but does not identify owners, team members, experience, history, credentials, or operational standards.	Needs Attention
Contact proof	Phone and email are visible, but there are no published customer-facing hours, legal entity details, or verified Business Profile link.	Needs Attention
Social proof	No genuine testimonials, review counts, case studies, partner logos, press mentions, awards, or third-party citations were found.	Missing
Experience evidence	The site makes service claims but provides few original stories, delivery examples, photo credits, process details, or measurable outcomes.	Missing

Content for AI Synthesis

Signal	Finding	Status
Clear proposition	Delivery-only exotic rentals in LA and Orange County is plainly stated near the top and in schema.	Good
Factual density	Pages contain practical logistics but few specific policies, ranges, timing commitments, vehicle facts, or verifiable local details.	Needs Attention
Originality	Location copy is distinct, but page structures are highly templated and lack proprietary data or first-hand evidence.	Needs Attention
Source citations	No authoritative external sources are cited for airport rules, insurance guidance, driving requirements, or local travel claims.	Missing
Comprehensiveness	Most pages answer only the opening booking question and	Missing

Signal	Finding	Status
s	omit pricing factors, delivery zones, approval timelines, FAQs, and examples.	

Technical GEO

Signal	Finding	Status
Crawlability	Public pages and assets are crawlable over HTTPS; robots.txt does not block AI/search crawlers.	Good
Entity graph	Organization schema links Instagram through sameAs, but no Google Business Profile, YouTube, LinkedIn, press, or directory entities are connected.	Needs Attention
JavaScript dependency	Inventory and monthly specials rely heavily on client-side data, which reduces reliability for crawlers that render incompletely.	Needs Attention
Rich schema depth	Service and organization schema exist, but reviews, offers, inventory lists, breadcrumbs, and FAQs are absent.	Needs Attention

AEO Analysis

Score: 3/10 - Needs Work

Featured Snippet Eligibility

Signal	Finding	Status
Direct answers	The homepage FAQ has concise answers, but most location pages begin with narrative copy instead of 40-60 word direct answers.	Needs Attention
Question headings	Most H2/H3 headings are descriptive rather than natural-language questions customers ask.	Missing
Lists	Some policy and airport pages use useful lists, creating limited list-snippet potential.	Needs Attention
Tables	No comparison tables cover vehicle types, requirements, delivery zones, or pricing factors.	Missing
Definitions	The site does not use concise "X is..." definitions for delivery-only exotic rental, approval, deposits, or insurance requirements.	Missing

Structured Answer Formats

Signal	Finding	Status
FAQ content	Four homepage questions cover requirements, photography, response speed, and pricing.	Good
FAQ schema	FAQPage JSON-LD is absent, reducing machine-readable answer clarity.	Missing
HowTo content	The quote and approval journey is not presented as a numbered step-by-step process or HowTo schema.	Missing
Speakable	No SpeakableSpecification is present; this is optional and lower priority than clearer answer copy.	Needs Attention

Voice Search Readiness

Signal	Finding	Status
Conversational	Tone is natural and concise, especially in FAQs and	Good

Signal	Finding	Status
copy	airport-delivery pages.	
Long-tail coverage	The site lacks dedicated answers to age, insurance, deposit, mileage, delivery timing, airport handoff, and cancellation questions.	Missing
Local signals	Phone and service areas are strong; delivery-only status is explicit. Hours and Google Business Profile validation are absent.	Needs Attention
Answer consistency	Some older cached/search-rendered content may still show stale June promotional language until updated monthly-special code is deployed.	Needs Attention

Priority Recommendations

Priority	Issue	Dimension	Effort	Impact
Critical	Verify Google Business Profile and Search Console; submit sitemap and request indexing for homepage, fleet, About, and six location pages.	SEO/GEO	Medium	Very High
Critical	Replace anonymous About copy with real owner/team identity, business history, operating experience, hours, and verifiable credentials.	GEO	Medium	Very High
High	Add genuine customer reviews, delivery stories, original photos, partner mentions, and permission-backed testimonials.	GEO/SEO	Medium	Very High
High	Server-render active inventory links/content or generate a current inventory sitemap so crawlers reliably discover available vehicles.	SEO	High	High
High	Expand each location page to 600-900 useful words with delivery boundaries, timing, local examples, FAQs, and contextual fleet links.	SEO/ GEO/AEO	High	High
High	Add FAQPage schema and 6-10 concise, policy-safe answers covering insurance, age, deposits, mileage, delivery, cancellation, and airport handoffs.	AEO	Medium	High
Medium	Add ItemList/OfferCatalog and BreadcrumbList schema; add valid vehicle/offer schema only where inventory and rates are confirmed.	SEO/GEO	Medium	Medium
Medium	Publish first-hand local guides and vehicle comparisons with named authors, update dates, and authoritative citations.	GEO/AEO	High	High
Quick Win	Shorten homepage description to about 150-160 characters and strengthen calls to action on short inner-page descriptions.	SEO	Low	Medium
Quick Win	Remove empty homepage H2 elements and ensure the partner H1 has	SEO/AEO	Low	Medium

Priority	Issue	Dimension	Effort	Impact
	meaningful static text in raw HTML.			
Quick Win	Add visible business hours and link the verified Google Business Profile once available.	GEO/Local	Low	High
Quick Win	Deploy the current monthly-special and insurance-form updates so public content no longer remains hard-coded to June.	SEO/Trust	Low	Medium

What's Working Well

- The preferred www domain, HTTPS, canonical URLs, robots.txt, and sitemap are aligned.
- All 11 meaningful audited pages returned HTTP 200 and included one H1.
- Titles and descriptions are unique across the audited page set.
- Homepage Organization/AutoRental schema is valid and includes the real phone, service area, logo, URL, and Instagram.
- Six local pages are differentiated by city or airport use case rather than being exact duplicates.
- The delivery-only model is clearly stated, avoiding false storefront claims.
- No audited HTML image lacked an alt attribute.
- The site has practical policy and quote information that can be expanded into stronger answer content.

Glossary

SEO - Search Engine Optimization

Improving crawlability, relevance, technical quality, content, and authority so pages can rank in traditional search results.

GEO - Generative Engine Optimization

Making the business and its content clear, trustworthy, factual, and cite-worthy for AI systems such as Google AI Overviews, ChatGPT Search, Gemini, and Perplexity.

AEO - Answer Engine Optimization

Structuring concise answers, lists, tables, FAQs, and schema so search engines and voice assistants can extract direct responses.

Audit Limitations and Sources

This audit assessed live HTML, HTTP responses, navigation, robots.txt, sitemap.xml, headings, metadata, links, images, structured data, content depth, and sampled search visibility on July 12, 2026. It did not measure field Core Web Vitals, backlink authority, Google Business Profile status, conversion analytics, or Search Console coverage because those require account access or dedicated tools.
